

Samuel Ibeh

Summary

Experienced Senior Software Engineer with a track record of achieving goals, possessing extensive expertise in FullStack Software Web and Mobile development. Committed to fostering collaboration, building cohesive teams, driving success, and applying a solution-focused approach to intricate problem-solving challenges.

RELEVANT EXPERIENCE

Senior Software Engineer @ Vidor

June 2021 - Current // Delaware, USA

- Successfully Architected, implemented, and shipped highly interactive customer-facing web and mobile applications
- Developed and maintained robust and scalable backend systems for a high-traffic e-commerce platform, utilizing technologies such as JavaScript, Amplify, AWS AppSync, Serverless, and DynamoDB.
- Designed, developed, and implemented a RESTful API using Node.js and AWS Lambda, facilitating seamless communication between the mobile app and backend services
- Analyzed and conducted regular code refactoring and performance optimizations, resulting in a 30% reduction in app loading times and enhanced overall app responsiveness.
- Managed a team of software engineers and facilitated agile methodologies to ensure project success
- Migrated the company's infrastructure to the cloud, improving scalability and reducing costs by 20%
- Led developing and implementing technology roadmaps that align with the company's long-term goals.
- Collaborated with cross-functional teams to optimize business processes and improve operational efficiency.

Lead, Software Engineer @ Farmsby

July 2020 - December 2021 // Lagos, Nigeria

- Migrated legacy backend service from PHP to a modern tech stack using JavaScript (Node.js), PostgreSQL, and Python, resulting in a 40% improvement in response times and enhanced code maintainability.
- Write modern, performant, robust code for diverse client and internal projects.
- Collaborated with five engineers to refactor and rewrite critical components, ensuring a smooth transition without disrupting service availability.
- Engineered and maintained major features of Farmsby's customer-facing web app using ES6, React Native, Backbone, Marionette, and CSS

Head, Software Engineer @ ITSync Synergy

April 2016 - February 2021 // Lagos, Nigeria

- Developed on-demand web, mobile, and device software for various sectors, including - banking, oil and gas, and medicine.
- Set up and implemented business management solutions for various companies, including startups, NGOs, and multinationals.
- Built and scaled various business systems and servers, including enterprise-grade services.
- Implemented agile methodologies to improve project delivery and enhance collaboration between cross-functional teams.

Software Engineer @ Silicon South Technologies

January 2015 - March 2016 // Port Harcourt, Nigeria

- Interfaced with clients weekly, providing technological expertise and knowledge
- Worked with various languages, frameworks, and content management systems such as JavaScript, WordPress, Drupal, Joomla, Magento, etc.

SKILLS

Programming Languages

JavaScript (ES6), TypeScript, HTML, CSS/Sass, GraphQL, Python, Ruby, PHP.

Libraries & Frameworks

React, Gatsby, Vue, WebPack, Node.js, Express, ReactNative, NativeScript, Amplify, Redux, Flask, Django, WordPress, VueJS, Marionette, etc.

Tools & Platforms

Git, Gulp, Webpack, Netlify, AWS, Heroku, Lambda, Docker, Firebase, Fargate, Slack, EC2, etc.

EDUCATION

CODE University

2021 // Berlin, Germany

Bachelor of Science in Product Management

Minors in Software Engineering and Interaction & Experience Design

Federal University of Technology, Owerri

2010 - 2016 // Imo, Nigeria

Bachelor of Science in Chemistry

COMMUNITY PROJECTS

Keeping it Real Foundation (KIR)

2015 - 2018 // Rivers, Nigeria

Trained people with disabilities, including the deaf and mute, on tech skills. Including basic programming and computer use.

INTERESTS

Fitness, Music, traveling, reading, hiking.

LANGUAGES

English, American Sign Language, British Sign Language, Yoruba, Igbo
